

Summer Math Assignment 3  
Crystals

Go to the link:

<http://mathforum.org/alejandre/workshops/toc.crystal.html>

You will find the following sections:

Crystallography  
Systems of Crystals  
Paper Nets

Read each section and write a summary of each.

For the Systems of Crystals section, chose one specific type of crystal and make a short report (including information and pictures).

For the Paper Nets section, print out and construct each type of crystal (only one of each)

In the descriptions, when it refers to groups of students, assume it's just YOU!
